Dear Parents and Students

It is not in our hands to have a pretty face, but it is in our hands to have a smile on our faces. We all have problems around us. Our neighbours, friends, children, mothers and fathers can be influenced with what we say, they could make decisions in their lives with what we tell them. We must put out positive energy around ourselves at all times. At times we might have to smile even though we don't want to, but we need to. To see positively is to think positively, and positive thinking will give you a positive life.

In the last few weeks the programs that we had organised with parents are going good. This week we had Manti for lunch order and it was better than what we expected. Our parents have provided their help and washed and ironed our second hand school uniforms. They are like new. We will be selling them cheaper than their prizes. I thank parents for their help.

I hope all is as you please
