Dear Parents and students,

About six years ago, you decided to make a start on a good project. I am sure you were unaware of the amount of success this start would bring. I am sure that your intentions were very noble indeed. You were all thinking of the next generation in opening a school and giving them some protection. We could say that our wishes have come true as we have just such a school today. For the students’ future we have to extend our school. Education has to be our first priority in the future.

Mums and dads are the most important role models for their children. They are the 1st people a child meets when they are born. They continue on their life path by using what they have learnt from mum and dad. Bad habits may seem insignificant at this early stage but you can be assured they will grow into the major problems of tomorrow. Unfortunately we cannot turn back time. Holidays are coming. Let’s please put this among our life plans for our kids as well. You can be sure that this will bring many long term benefits to you.

Isn't it time that we made some changes in our life for the sake of our children?

I hope all is as you please…

Nail UMUR - Principal.
REMINDER:

* Students have been given notes to update address their home phone and Mobile phone number. Students need to return these notes to the office in an envelope.

* Students are not allowed to have noodles at school because of healthy and safety issues. Hot water is the main concern for us.

* Students have been given notes from our school nurse Nurdan Ors. Parents need to send it to school in an envelope.

* Shoes with shoe laces are not very safe for P/1. We prefer Velcro shoes.

* Students have been to Bendigo Discovery Science & Technology Centre. We thank parents who helped students on the excursion day.

Thank-you

Exam Week

Grade 1/2/3
23rd Monday: Mathematics exam
24th Tuesday: English Exam

OFFICE HOURS
Monday - Friday
8.20am - 4.20pm
We did some wonderful Art work this week. The students in Prep and Grade 1 traced around their hand and their foot. They decorated them using textas and did a variety of interesting patterns on them.

Students used internet to research about their favourite planet. They wrote wonderful reports using the information gathered from the internet. Filiz Sayik and Ahmet Torun with their planet reports.

We went for an excursion. Some children had a lot of fun on the vertical slide, some couldn't do it. Here behnan is trying to do an experiment.
**spot the difference**

There are 8 differences between these pictures. Can you find them?

Write a sentence about a rabbit.
