TWO ISIK College students have proved themselves against some of the best information technology students in the world.

Year 10 student Saba Gul and Danielle Bausch, year 9, travelled to Romania and Turkey to compete in two competitions, and returned with a swag of medals.

The Infomatrix ICT Olympiads were held in Bucharest, Romania, where Saba won the gold medal in the website design (digital content) category, competing against 100 other teams.

"I started just by seeing other people online and seeing their work, and I wanted to learn it," she said.

The students then travelled to Ankara, Turkey, for the Ebiko International ICT Olympiads from May 15-17.

Danielle presented her Sir Howard Florey digital content project, which earned her a second silver medal for the tour, while Saba also won a silver medal for her website design project.

This is the first year Australia was represented in a field of 2870 teams from 65 cities and 29 countries.

Isik College teacher Zuleyha Aykan escorted the students on the trip.

"We were also given extra time to see Romania and Turkey which broadened the students' knowledge and their view of the world," she said.
